PROFESSIONAL SUMMARY

Software engineer with 4+ years of experience across full-stack development, enterprise systems, and freelance client delivery. Comfortable working across the stack, from Laravel/PHP enterprise platforms to Next.js/React applications, with CCNA-level networking knowledge and hands-on Linux and Docker experience. Currently building features for an enterprise ERP system while running an active freelance practice delivering production websites for independent business clients.

PROFESSIONAL EXPERIENCE

Software Engineer | Script Shock

April 2026 – Present · Blida, Algeria

- Work across front-end development and database administration, building and maintaining features as part of the on-site engineering team.
- Contribute to an enterprise travel booking system embedded within a larger multi-tenant ERP platform, built with Laravel/PHP.

Freelance Software Developer | Self-Employed

April 2024 – Present · Remote / Algeria

- Design, build, and deploy full websites and web applications for independent business clients, handling everything from data layer to production deployment.
- Clients include Groupe GADI (industrial holding), DAMAC PLUS (real estate), and KTM (Kadri Transformation Métallique, industrial metalworking), among others.
- Work with PostgreSQL-backed data layers and Prisma ORM alongside Next.js front ends.

Frontend Developer | SnovaTech

February 2025 – February 2026 · Remote

- Delivered front-end features for a solar energy simulation platform built with Next.js, focused on financial projection tools and ROI analysis for Algerian consumers.
- Improved UI consistency and rendering performance across the application.

Web Developer | Kara Automobile

February 2024 – January 2025 · Blida, Algeria

- Supported the company's digital presence and internal documentation workflows through an on-site web development role.

Full-Stack Developer | Ultra Light

July 2023 – September 2024 · Blida, Algeria

- Led development of the company's corporate website using Laravel, architecting a custom web application focused on performance, scalability, and security.
- Designed application architecture aligned with business objectives and internal workflow requirements.

KEY PROJECTS

Photographer & Client Reservation Platform | Full-Stack Developer & System Architect

- Algeria's first marketplace connecting verified photographers with clients, covering portfolio showcases, booking management, and a secure payment flow.

Healthcare Management System | Academic Capstone Project

- Comprehensive system for managing patient records, appointments, and administrative tasks, built as the senior capstone project for a BTS in Web Development.
- Digitized manual clinic processes with a design prioritizing usability for medical staff.

Corporate & Industrial Business Platforms

- Developed multiple corporate websites and internal management systems for industrial and business clients, each aligned to specific operational workflows.

EDUCATION

BTS Degree in Web Development

September 2022 – April 2025 · INFSP AIG Khalil Zyat, Blida, Algeria

Comprehensive curriculum covering development, networking, and system design. Senior project: Healthcare Management System.

Baccalaureate in Management and Economy

July 2020 · Blida, Algeria

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) | Cisco Systems, 2025

Network fundamentals, IP connectivity and services, security fundamentals, and automation.

Docker Certified Associate | Docker Inc., 2023

Containerization, image creation, orchestration, and deployment of containerized applications.
